TRANSPORT, LIFTING AND LARGE SCALE HANDLING

Born from the courage and foresight of its founder, Terzo Battazza, the company established itself in the world of road haulage in the early 1960s, with the aim of becoming a reference point for the Lecco mechanical steel district, guaranteeing transport and logistics solutions capable of satisfying the needs of its customers.

Led by the unceasing commitment of the founder's six sons and daughters, still at the helm of the Group today, and the ability to adapt to the continuous transformations of the economic and industrial sector, the company has been able to evolve over time, constantly investing in new means and technologies and differentiating its offering according to a model that makes high specialization and recognized quality of service its competitive advantage.

With over sixty years of presence in the field, Battazza in 2018 surpassed the milestone of 50 years since the establishment as a Company. Now in its fourth generation, Battazza, supported by expert and qualified women and men, is today positioned on the market as an integrated and intermodal logistics operator, and continues to advance towards the future day after day with unchanged passion.

EXCEPTIONAL TRANSPORT

Exceptional transport and/or transport in exceptional conditions is a distinctive element of our offer. The company boasts long and recognized experience in this type of service, which is destined for continuous investments. Special vehicles used include modular trailers equipped for the movement of artifacts of any size, "special" semi-trailers for the transport of civil and/or industrial constructions (in wood, steel and pre-stressed reinforced concrete) hydraulic presses, transformers, generators.

INDUSTRIAL TRANSPORT

In the industrial shipping sector, Battazza S.p.A. places itself on the market by offering a highly diversified range of transport services, both nationally and internationally. Thanks to the high professionalism of its collaborators, continuous investments in the vehicle fleet and a dense network of qualified artisan haulers, the company cooperates effectively with the main players in the steel and metalworking industry, taking care of the transport of materials and manufactured goods in detail. With equal dynamism, Battazza operates as a partner for industrial plant manufacturers.

LIFTING WITH CRANES

The company can count on a vehicle fleet including small, medium and large capacity cranes, capable of responding to any type of lifting need. The versatile and high-performance cranes are used for several interventions, both indoors and outdoors, and are ideal for lifting in tight spaces or for operations at height. Thanks to the use of specialized machinery, Battazza S.p.A. is able to offer precise and safe solutions, even for heavy loads and delicate operations. Furthermore, the company is equipped with trucks with rear-cab crane, managing transport with loading and unloading in complete autonomy. Over the years, Battazza has gained extensive experience in the assembly of overhead cranes, building materials roof lifting and industrial machinery handling, loading and unloading.

SPECIAL ASSEMBLY

Over the years, the company has acquired solid experience in managing large-scale projects, including the assembly of presses, rolling mills, turbines and all types of mechanical structures. Furthermore, it has developed strong expertise in the assembly and handling of large transformers, offering technical and innovative solutions for industrial lifting needs. The equipment and machinery is designed to ensure safe and efficient operations, especially indoors or in tight spaces, where precision and compactness are essential. All equipment is approved and tested according to CE regulations, ensuring maximum safety during every operation.

LOGISTICS AND INTERMODALITY

Brambilla Scalo Srl, a historic Lecco company, is the partner company of Battazza S.p.A. – sole shareholder, operating at the strategic Lecco-Maggianico railway station. Through a tested “door to door” car wagon system, Brambilla Scalo offers intermodal services, taking care of the transshipment of goods arriving and departing from Lecco Maggianico station and destined for all the main Italian and European routes. The company, equipped with the most modern loading and unloading systems, has been able to expand the range of services offered and the type of sectors served over the years, ranging from the traditional steel industry to the mineral water industry.
